## Quality Policy

We at **Crimpswell Services**, are committed to delivering **high-precision aerospace components** that meet or exceed customer, regulatory, and statutory requirements by maintaining the highest standards of **product quality, reliability, and traceability**.

We shall achieve this through:

- **Compliance** with the AS9100D Quality Management System and continual improvement of its effectiveness.
- **Customer Focus**, ensuring satisfaction through consistent delivery of conforming, on-time, and fully traceable aerospace parts.
- **Risk-Based Thinking** and process controls to prevent defects, mitigate operational risks, and ensure airworthiness.
- **Employee Competence and Engagement** through regular training, awareness, and skill enhancement aligned with aerospace quality objectives.
- **Data-Driven Decision Making** through internal audits, quality KPIs, and management reviews for continual improvement.
- **Ethical and Responsible Sourcing**, ensuring zero counterfeit risk and compliance with industry standards.

Our goal is to be recognized as a **trusted aerospace partner** by our stakeholders, through innovation, operational excellence, and an unyielding commitment to **quality and safety**.
